CHAIRMAN'S MESSAGE

It is my great pleasure to extend heartfelt greetings to the readers of the 6th CLHRC News Letter 'Jesus Heals'. The Constant Lievens Hospital and Research Centre of the Catholic Bishops' Conference of India has been to its developmental drive since June 2016. The primary task of the hospital management has been to plan and execute progressive methods and steps to give a new lease of life to the old holy family hospital. Towards achieving the present stable status the Governing Board of the Society together with the hospital management shouldered the responsibility. And therefore today the hospital has grown in to a fully fledged health care centre.

For us, the challenges of today are crammed with possibilities and we are confident that our pioneering spirit will help us to expand health care even during those testing epoch. My sincere grateful heart to all our dear contributors for their spiritual and monetary support. I honestly thank the MSFS North East India Province and congratulate the Project Director, Fr. George Pekkadenkuzhy msfs, and his team for their tireless efforts to take the Medical College project forward.

Invoking God's blessings.

DIRECTOR'S DESK

"If the Plan does not Work Change the Plan but Not the Goal."

Constant Lievens Hospital and Research Centre is a quality and service oriented Hospital with a global vision and reach. The journey of the Hospital started in the year 2016 towards achieving a goal of Medical College and hospital in near future. It had a very modest beginning when the Holy Family Hospital was taken over by the Catholic Bishops' Conference of India to make it a higher centre of health care and healing.

From its humble origin, the Hospital has over the past two years reached a pre-eminent position in its service segment with fully operational health care facilities. Mainly the hospital caters to the marginalized tribal sections of the State of Jharkhand. C L H R C envisions itself as a national and international performer with a local presence and constantly tries to locate its facilities for the poor and underprivileged.

The Project's growth has been possible due to strategic planning of the Governing Board and meticulous execution of the Hospital Management from time to time. None of these accomplishments or future plans would be possible without the work of the talented and dedicated staff here at Constant Lievens Hospital. Nor would they be possible without your support. Please know that I remain grateful for both.
